

TG1

Tweeter

Innovation September 2005, this tweeter is equipped with a dome of 25 mm of titanium covered with gold, this in order to obtain the most rigid and light dome possible. Thanks to a specific treatment of the dome, we kept all the qualities brought by titanium (impulse response, linearity, efficiency) and removed any metal aggressiveness in the top of the spectrum. It is been driven by a powerful neodymium magnet which enables him to reach 98 dB of output.

This tweeter will surprise you by his natural reproduction, its softness, its precision and its high efficiency.

The TG1 is available in version 4 ohms (TG1/4) or 8 ohms (TG1/8).

TG1 Specifications

Bande passante	2500 à 20 kHz +/- 1.5 dB
Efficiency (TG1/4)	98 dB/W à 1m
Efficiency (TG1/8)	97 dB/W à 1m
Impedance	4 et 8 ohms
Re DC (TG1/4)	3.9 ohms
Re DC (TG1/8)	6.1 ohms
Power max. RMS	50 W
Resonance frequency	1200 Hz
Diameter	110 mm
Fixing diameter	100 mm
Front face thickness	5 mm
Depth	40 mm
Weight	0.5 kg
