

SQ-5-RK19 fitting note

The SQ-5-RK19 kit contains the rack ears and fixing screws needed to mount the SQ-5 in a standard 19" rack. It requires 12U of available space.

When mounting, be aware that the SQ needs adequate ventilation to the underside of the unit where cooling fans are located.

Use only the supplied fixings to attach the rack ears to the SQ-5. Using other fittings may cause damage to the unit and/or rack ears.

Check the contents

Item Number	Description	QTY
AA11053-L	Left Rack Ear	1
AA11053-R	Right Rack Ear	1
AB0332	M4 Torx® Screw	6

Tools required

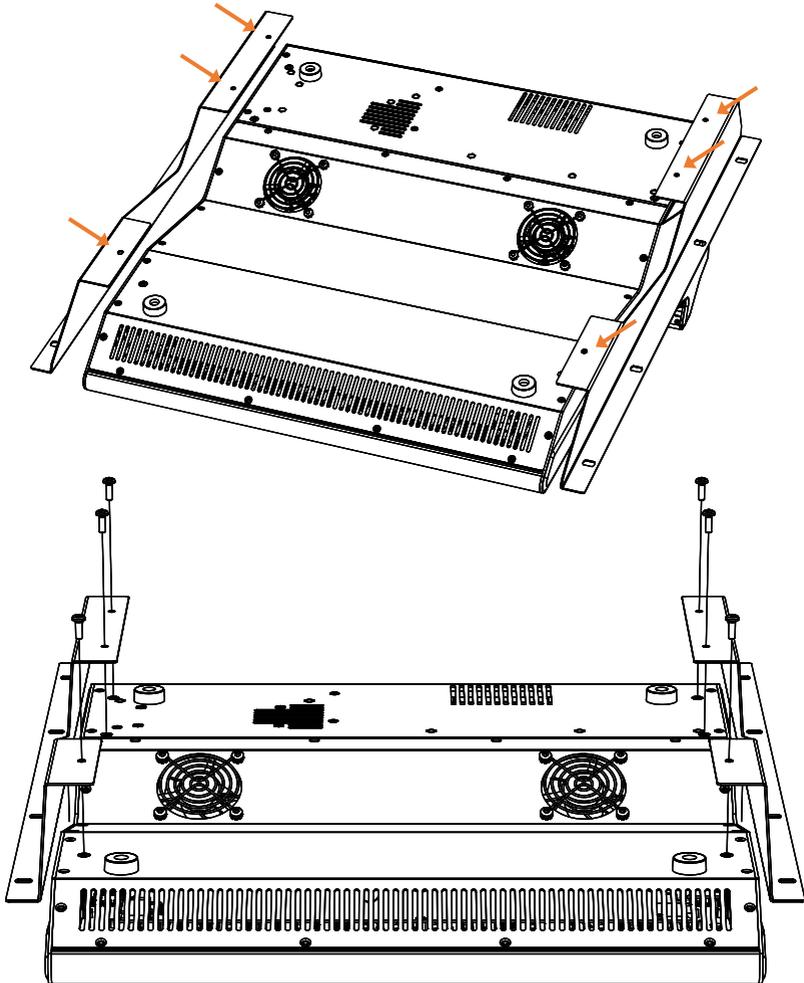

Pozi P3 driver

Torx® T20 driver

Instructions

1. Place the SQ-5 face down on a padded surface, taking care not to place pressure on the faders or encoders.
2. Line up the rack ears with the unused screw holes at either side of the SQ – noting that each will only align correctly to one side.
3. Secure each rack ear using three of the provided M4 Torx® screws.
4. Turn over the SQ-5 and fit to rack using all 8 available fixing points.
