

KEY FEATURES

- High sensitivity: 101 dB
- Extended frequency range: 1 - 20 kHz
- Extremely linear frequency response
- Low harmonic distortion
- 1" aluminium voice coil with polyimide former
- Neodymium magnet
- Good power handling: 15 w AES above 1.5 kHz

GENERAL DESCRIPTION

This soft dome tweeter is designed for good quality high frequency reproduction in two or three way cabinets. It features an small horn in order to improve sensitivity and control dispersion. Moreover, the use of a neodymium magnet contributes to achieve an specially high sensitivity (101 dB). In spite of this sensitivity, the distortion is maintained very low, obtaining a very clean sound. By the other hand, this tweeter can be used with a quite low crossover frequency (1.5 kHz) making it useful for many different two way applications.
