Flexi Screen

Ref. - FLEXISCREEN

EAN13 - 5600217588404

Box - 30 x 40 x 20 cm

Weight - 1,3 kg

Each panel - 27 x 33 x 3,7 cm

Units per Box - 1

Features

The Flexi Screen is the ideal portable solution for voice recording in rooms with lower or no acoustic treatment. The solution performs on untreated and scattered reflections in a room isolating the sound source from the original strength of the energy. Flexi Filter is composed by high quality materials performing as sound barriers and absorbers. In the delimited space of the Flexi Filter, sound becomes "drier", reducing significantly noise ambience.

The Flexi Filter is also adjustable to the microphone. Its structure in polyurethane is designed to give lightness and high efficiency of absorption to the solution. And, its combination with the wood applied in the exterior surface also grants it the barrier effect required whilst ensuring an attractive visual effect.

Technical Information

Material – Acoustic Foam and Wood

Color – Charcoal Gray and Light Brown (wood)

Adjustment – 2 Positions

Time to assemble – 30 seconds

Flexi Screen is made of 3 parts that can be detached and used in a more opened or closed way.
