

Jantzen Silver Coil

Our silver coil is made of pure silver foil Ag 99,97% and with a Polypropylene dielectric in a standard version, wound around a hardwood core.

Available in 16 AWG (1,33 mm²)

Because of the very tight winding we have achieved an extremely low magneto shrinking factor and virtually zero FM distortion.

Jantzen Silver Coil is even closer to the "ideal inductor" than our famous Cross Coil made of copper foil .

We guarantee the tolerance +/-1,0 %.

This product is devoted for the very best high-end loudspeaker systems.

Jantzen Silver Foil Coil 16 gauge sustains for 350 watts RMS.

For special requests we can also offer you Royal Silver Coil with teflon insulation between the pure silver foil layers.
